

A330-300/-200 P2F

▲ Proven design, high-level workmanship and expertise.

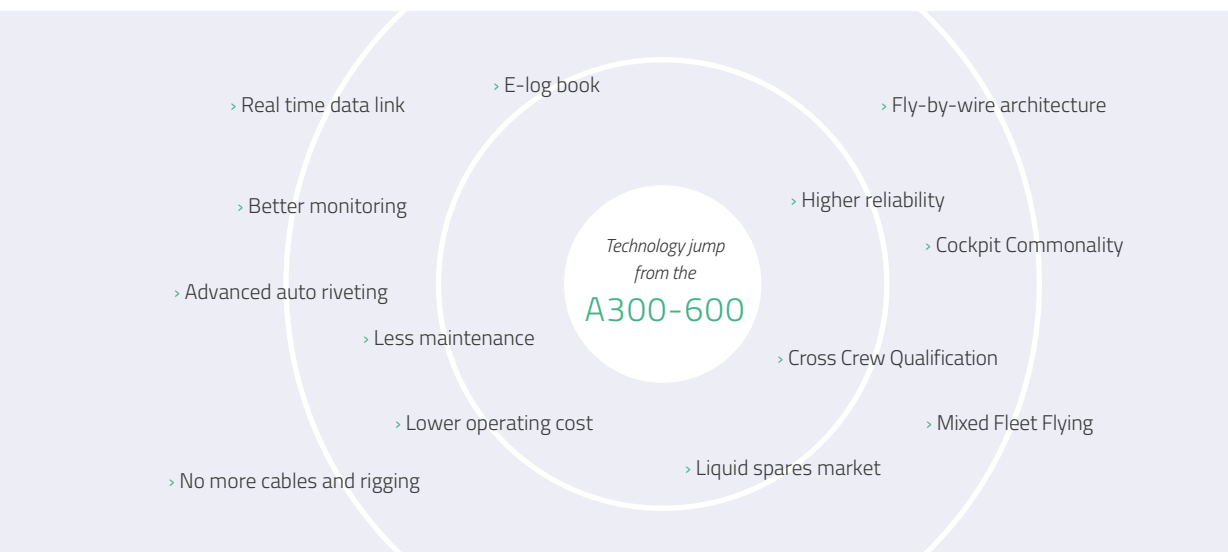

A NEW GENERATION PROVEN EXPERIENCE

Based on the success of the A300/A310P2F conversion program with more than 200 freighter aircraft redelivered worldwide, the next generation of Airbus medium widebody freighter conversions is ready to take over – the A330-200/-300P2F.

Unprecedented efficiency, the ideal volume & payload characteristics and a perfect integration into the

regular Airbus fleet will provide new standards in usability and economics in this market segment.

Alongside to the A320/A321P2F in the narrowbody segment and the Airbus A330-200F production freighter the A330-200/-300P2F is the backbone of the Airbus freighter family.

CONVERSION FEATURES

MAIN DECK CARGO DOOR

141" clear width & 101" clear height, hydraulically operated.

COURIER AREA WITH COURIER MODULE

4 CAS, full provisions for galley equipment, stowage compartment and all new Lav. A.

9G CRASH NET AND SMOKE CURTAIN

Proven design: weight saving and durability for maximum payload.

NEW REINFORCED FLOOR GRID & NEW FREIGHTER FLOOR PANELS

The all new freighter floor provides multiple benefits: optimized freighter floor for maximum running loads, all-new structure for long-term operational freedom, less corrosion findings and less maintenance, no design service limitations by conversion kit, maximum commonality with its sister ships & high value for investors.

NEXT GENERATION POWERED CARGO LOADING SYSTEM

All-new **powered** CLS by ANCRA. Fail-safe system architecture. Maximum flexibility & multiple ULD arrangements.

CLASS E CARGO COMPARTMENT & CARGO LININGS

Proven solution derived from successful 2nd generation A300-600P2F.

OPTIONAL FEATURES

- Extra Seats
- Flight Crew Rest Compartment
- Livestock Transportation Option
- Integrated Manuals
- Cockpit upgrades
- 16/20ft Pallet Option

FURTHER MODIFICATIONS

- Window Plugs
- Deactivated doors 2, 3 & 4
- Smoke detection system
- Modified air distribution system
- Computer modifications
- Modified water & waste system
- Modified hydraulic system
- Modified lighting system

Additional revenues per flight – The 96" side-by-side AMV containers make full use of Airbus superior cross-section allowing up to 10% more volume compared to 88" x 125" ULD.
